'Fresh from the gardens'

Don't Attempt Too Much

In these days everybody is, or at least should be, learning some valuable lessons in the economics of business and work which should assist him in the years to come. The experiences of today are, undoubtedly, revealing to some people just where they made mistakes in the past, mistakes which had they been avoided would not have landed them in some of their difficulties of the present. Countless thousands of people are being compelled to make drastic retrenchments in the conduct of their business, living expenses, etc., which would not have been so necessary had reasonable retrenchment been made in years gone by and a curb placed upon the satisfaction of their desires. Many people are saying "Never again" when they are caught doing what they formerly did and mistakenly did not.

The varying detail of the great lesson which experience in teaching us cannot be discussed in one article or possibly in one hundred articles. But in reading a recent magazine article, dealing with the life experiences of one man in which that man told of an incident happening when he was six years old, and which he considers the most important lesson he ever learned, in school or out, the thought presented itself that in this new Western country perhaps a goodly number of people have made the mistake which this man so early in life learned to avoid. At all events the incident is, we believe, worth repeating inasmuch as it carries its own interpretation.

The now eminently successful man to whom reference is made was set to work by his father thinking out the growing peaches from trees that were too heavily laden. The boy protested to his father that he did not see any sense in so doing, and asked: "Why not let them all grow and have more peaches?" "All right," replied the father, "We'll try it both ways. One tree we won't touch at all. That'll be your tree. The other tree we'll thin out so that the only peaches left will be at least six inches apart. That'll be my tree. And we'll see what'll happen." The boy, now grown to successful manhood, says he watched the fruit grow and ripen and at last the fruit was ready to pick. "My tree," he says, "yielded about six bushels of runty little cukes. And my father's tree yielded more than eight bushels of fine, large peaches. All because he had thinned out the load on his tree and left mine to struggle along with more than it could handle."

And all that this wise father said to his boy: "There are a lot like people. If you want to get good work out of them, you have to find out how much work they can handle well. Then give them that much work to do. If you try to work them too hard, you'll spread their energy all along the line and give you second-rate results."

The question is: Have not too many of us here in the West spread ourselves out too much, instead of concentrating on the main job? In an intense desire, a laudable ambition, to get on, have we not attempted too much, dissipated our energies over too great an area instead of giving greater application to fewer things and made them truly successful? For example, have not many of us yielded to the very natural temptation to acquire more land than we can successfully cultivate, rather than be content to work to its capacity the old or half section? Have we not been tempted to be better off today had we resisted that temptation to spread out, to take on too much?

And is not this simple illustration of increase of acres acquired, this spreading out of our energies which increase entailed, merely an illustration after all of other tendencies in our life which, when the first check comes, or difficulties arise, land us in trouble beyond our capacity to handle?

Each man doing his own particular job and doing it well, rather than attempting several jobs and doing all of them in an inferior way, is the sound, safe way—the way which, in the long run, achieves the largest measure of success.

Condition Not Alarming

Alberta Does Not Fear Grasshopper and Cut Worm Outbreaks Next Spring

No alarm is felt regarding the possible serious outbreak of grasshoppers and cutworms next summer. H. Craig, Deputy Minister of Agriculture, in Alberta, informed the Canadian Press.

"We have information that thousands of grasshopper eggs have been laid in this province, particularly in the southern part," said Mr. Craig, "but it is not alarming for our experts have large stores of poison bait all prepared for just such an emergency."

"Every year we have some trouble with cutworms and they are likely to be found fairly numerous next year, but this too, is not alarming. We have knowledge of these possible outbreaks and we are prepared to act quickly, so feel certain that the situation will never get out of control in Alberta."

A Glass Of Cold Milk

School days are milk days and rightly so, because no other food is so refreshing, healthful and nourishing as milk. When the boy or girl comes home from school at four o'clock they are hungry and tired and the wise mother knows that a glass of milk is the most healthful and easily prepared food she can provide. The four o'clock glass of milk should be part of the school-day programme.—Department of Agriculture, Ottawa.

Tramp—Have you a nice piece of cake, lady, to give a poor man who hasn't had a bite for two days?

"Cake? I ain't bread good enough for you?"

Tramp—Ordinarily, yes, ma'am, but this is my birthday.

And what is income? Something difficult to live within and impossible to live without.

Nearly 100,000 people in the Barcelona district of Spain are working in textile mills.

Proposed Power Project

Northern Saskatchewan Hydro Development Would Serve All Cities Of Province

A gigantic hydro-electric power project in northern Saskatchewan to serve Regina, Saskatoon, Moose Jaw and Prince Albert, is declared "economically feasible" in a report that will come under the consideration of the Saskatchewan cabinet.

The project, proposed on a site on the Saskatchewan River near Fort Lacombe, would generate a total of \$12,207,135 and would generate a total of 125,000 horse-power.

Details of the proposed undertaking are contained in a report of H. G. Acres and Co., Ltd., consulting engineers, of Niagara Falls, made to the Saskatchewan Power Commission.

A feature of the project would be the linking of Saskatchewan's cities in a net of power transmission lines bearing current from the huge northern generating station. Present lines owned by the commission, it is stated, could be used in part.

Fort Lacombe is situated on the Saskatchewan River about 60 miles east of Prince Albert.

Age Of Leading Men

The ages of some of the leading men in England just now are interesting. The Prime Minister is 65. Mr. Baldwin, 64. Mr. Snowden, 67. Mr. Arthur Henderson, 68. Mr. Neville Chamberlain, 62; and Lord Reading 71. Mr. Winston Churchill is 57. Sir John Simon, 58; Sir Herbert Samuel, 61; Lord Sankey, 65; Mr. Lloyd George, 68. Mr. William Graham, 44; Sir William Jowitt, 46; Mr. Herbert Morrison, 43; Sir Stafford Cripps, 42; Mr. Ernest Bevin, 50.

Greece is encouraging the amalgamation of corporations.

Actresses will happen in the best regulated families.

Basic economic conditions in Japan are reported to be improving.

So Short Of Breath Would Have To Sit Down

Mr. C. M. Stroeder, Hanover, Ont., writes:—"I could hardly do my work, and after going up or down stairs I had to sit or lie down for a while as I would be all out of breath."

I could hardly go down town for I walked to or three blocks I was ready to fall over.

I took several boxes of Milburn's Heart and Nerve Pills and am glad to say I have been totally relieved of my trouble."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Ltd., Toronto, Ont.

Clause Again In Use

War In Manchuria Boosts Insurance Rates For Pacific Shipping

War insurance rates are now being quoted by companies dealing with Pacific shipping, it is announced.

Although the war clause has been in all insurance policies it has been inactive since the end of the Great War. When that conflict broke out the war risk rate to the Orient was as high as 2 1/2 per cent. owing to the presence on the Pacific of German raiders.

The insurance companies announce that war insurance will be applied on cargo from Hong Kong northward, the scale increasing in proportion to the rate of possible risk. Hong Kong is lowest, with approximately 1.10 of one per cent. premium. Further north the rate jumps, approaching a full one per cent. for Harbin, where actual hostilities affect freight movements.

FASHION HINT

"How to make my old short skirts conform to the new length was a problem to me until I hit on this plan. I dropped the hem; and as the skirt had been turned under near the hem, I redid the skirt, the entire dress, after having bleached the goods, following directions in the Diamond Dyes for the dyeing of course. I have dyed many things—mooch, even coats—fast to wear and washing. Friends think my things are as good as new. I tint and dye with Diamond Dyes. They do give the most gorgeous colors."

Mrs. G.C. Lewis, Quebec.

A Debatable Question

Bill Drafted In Old Country To Make Voluntary Euthanasia Legal

The Medical Officer of Health for Leicester has drafted a bill to make voluntary euthanasia legal. The subject is far too important to be thrust on one side by the political controversies of the moment, and though, of course, the bill in question stands not the slightest chance of passing into law at present; and will very likely never even be introduced, it ought at least to stimulate a serious discussion of a problem far too long deliberately side-tracked. The proposal is that a person suffering from an incurable and acutely painful disease should be permitted, after legal authorization based on the most exhaustive examination of the case, to pass painlessly to death by his own desire. These are fundamental issues in the fields of law, of medicine and of religion. Reasoned objections and traditional prejudices will be ranged against it. There are few who would care to pronounce dogmatically that the proposal or the proposal or if it without prolonged and anxious reflection. But Dr. Millard, by once more giving the idea of euthanasia concrete form, has made it certain that the subject will be seriously explored.—London Spectator, London, England.

Heads Welfare Agency

Hon. T. A. Cresser To Direct New Organization In Winnipeg

Hon. T. A. Cresser, former Dominion Minister of Agriculture and Minister of Railways and Canals, heads a new organization of Winnipeg social agencies called the Greater Winnipeg Welfare Committee.

Under Mr. Cresser's direction representatives of some 100 social organizations will work for the betterment of conditions among the unemployed of the city and surrounding municipalities. Schemes to provide employment, recreation and entertainment with a view to keeping up the morale of the workless men and women will be inaugurated by the committee.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

Showed Originality

Illinois Woman Accused Of Singing Insults To Neighbor

Mrs. Eufemia Dubois of Evanston, Illinois, says she doesn't like to be insulted in the key of "F" or any other musical scale.

So she went before Police Magistrate Harry H. Porter and swore out a warrant for her neighbor, Mrs. Pearl C. Dorband, saying that for two years Mrs. Dorband has been singing insults at her from her back porch.

Sometimes, she said, the insults were by implication in popular songs and sometimes Mrs. Dorband just made up her own songs.

Already Dead

A certain Missouri editor refuses to publish obituary notices of people who, while living, failed to subscribe to his newspaper, and gives this pointed reason:—"People who do not take their home town paper are dead anyway, and their passing away has no news value."

"Doctor, isn't it true that we can live without the appendix?"

"Yes, the patient can, but for us surgeons it is indispensable."

BABY'S OWN SOAP

Never "dose" except on doctor's advice

VICKS

BEST FOR ADULTS TOO

Medical Scientists Make Important Discovery

Believe They Have Found Preventive For Infantile Paralysis

By making young monkeys too old for their age, two medical scientists at Columbia University have discovered a phenomenon which they hope may eventually lead to a powerful preventive weapon against infantile paralysis.

Dr. C. W. Jungblut and Dr. E. T. Engle injected extracts from the anterior pituitary glands of sheep and rats into immature monkeys of an age similar to the juvenile period when human children are most susceptible to the scourge. Then they inoculated the monkeys with a strong dose of infantile paralysis virus from human beings.

Instead of dying, as other monkeys had when subjected to the virus without a previous injection of the hormone extract, they resisted the disease entirely in some cases and developed only a passing attack of the paralysis in others.

Recipes For This Week

(By Betty Barclay)

SNOW-WHITE CHOCOLATE ROLL

(4 eggs)

6 tablespoons special cake flour, sifted.

6 tablespoons cocoa.

1/2 teaspoon baking powder.

1/4 teaspoon salt.

3/4 cup sifted sugar.

4 egg whites, stiffly beaten.

4 egg yolks, beaten until thick and lemon-colored.

Sift flour once, measure, add cocoa, baking powder, salt and egg whites, together three times. Fold sugar gradually into egg whites. Fold in egg yolks and vanilla. Fold in flour gradually. Pour into pan, 8 1/2 x 13 1/2 inches, lined with greased paper, and bake in hot oven (400 degrees Fahrenheit) 13 minutes. Turn from pan at once onto cloth covered with powdered sugar. Remove paper. Quickly cut off crisp edges of cake. Spread seven minute frosting over cake and roll. Wrap in cloth until cool. Cover with an uncooked chocolate frosting.

TOASTED COCONUT SQUARES

1 loaf white bread.

1 1/2 cups sweetened condensed milk.

1 can coconut, southern style.

Cut bread into 2-inch squares, 1/2-inch thick. Dip each square in milk and drain slightly. Then dip in coconut covering all sides well. Bake in moderate oven (325 degrees Fahrenheit) 25 minutes, or until golden brown. Make 3 1/2 dozen squares.

Palm Prints As Detectors

Just As Infallible As Finger Prints Opinion Of Inspector

Palm-prints as opposed to finger-prints were used for the first time in a court of law when a prisoner pleaded guilty at the Old Bailey to house-breaking and shop-breaking. The coroner asked whether palm-prints were as infallible as finger-prints. Detective-Inspector Cherrill said the yard had been studied by Scotland Yard for some time, the conclusion being in the affirmative.

A thick London fog costs the shipping industry alone as much as \$5,000,000 a day.

Production of coal and iron ore in Hungary is increasing.

CONSTIPATION

Banished for 20 Years

No one could have had more experience of constipation than this man. His method of correcting the trouble would surely put right anybody who suffers in a similar way.

I am now approaching my 40th birthday and have used Kruschen's for many years. As a boy and youth I suffered at frequent times agonies from constipation. This was, after a time, somewhat relieved by a special compound, but it was a weakening effect. On someone's recommendation I tried one of Kruschen's salts, and since then—a matter of at least 30 years ago—have used nothing else. My daily dose I take in hot water at 7.45 a.m.

E. A. D.

The six salts in Kruschen are Nature's own prescription for keeping the organs of elimination working properly—gently but surely expelling all poisonous waste matter every day.

Start on "The Little Daily Dose" of Kruschen to-morrow and so take the first step along the royal road to perfect health.

Another Triumph Of Electricity

Polysynthetic Electrical System Now In Use On Most Lines

Ever since John Harrison produced in 1765 the first marine chronometer, the science of keeping time on board ships at sea has become more and more accurate, until today, the average ocean passenger liner has at its disposal the combined knowledge of the world's observatories transmitted by wireless and recorded by electric clocks. There is, in fact, no excuse for being late nowadays aboard ship.

In the old days the chronometer served within a varying degree of accuracy to acquaint a captain with the time of the day or night, which he checked with the aid of observations of the sun and stars. Since the introduction of wireless telegraphy, it has been possible to keep a check on the chronometer of which every well-found ship carries three. Each is specially constructed to remain level and steady during the pitching and rolling, and is contained in a glass case maintaining an even temperature. In spite of this, there are always slight errors which are journalized. "Time is checked from time-signals sent out from shore by the observatories, and is all over the world, the signals being a broadcast of actual ticks of the observatory chronometer, over a period of five minutes," says Commander J. G. Hisset, R.D., R.N.R., in his fascinating book on the subject.

As a result of all these facilities for checking the chronometer, the average ship nowadays only carries one chronometer, or at the most two. The idea of carrying three before the days of wireless was so that one could be checked against the other, and in the event of a slight change of rate in any of them the two that synchronized could be taken as being in error.

How are ship's passengers to know the time so accurately obtained by the navigating officers on the bridge? Various means have been used, but the most modern system, known as "Pulsynthetic," is probably the best yet devised. By this system all the clocks in the ship's public rooms, engine rooms, offices, etc., are controlled electrically by a master clock usually located in the chart-room. The master clock is a strong time transmitter operated by a balance wheel—a pendulum being obviously impossible on board a ship at sea.

As the ship sails east or west into a different meridian the time is of course advanced or retarded. The "Pulsynthetic" impulse transmitter is fitted with an operating key-lever and a dial engraved with minutes, so that all the clocks on the circuit are automatically set to the time required. This system is now in general use on most Cunard steamers including the "A" ships and the "Aquitania."

The passenger, warned by notice boards of the intended departure of the ship each night, and armed with the correct time electrically transmitted simultaneously to all parts of the ship, has little excuse for being late for meals, dances, games or other amusements. The system which modern ship-life makes possible today.

For treatment of caked bags in cows, or garget, use Douglas' Egyptian Liniment—the quick, sure remedy. Saves time and expense. Prevents blemished stock.

King Decorates Airmen

Aviators Who Captured Records Received Air Force Cross

The two airmen who have travelled faster than any one else in the world, Flight Lieutenants G. H. Stainforth and J. N. Boothman, received the Air Force Cross from King George at Buckingham Palace in recognition of their feats—winning the Schneider Cup outright for Britain and breaking the world's air speed record.

The fliers spent forty minutes with the King. Then they walked out modestly and slipped the decorations into their pockets.

Flight Lieutenant G. H. Stainforth set a world's air speed record of 408.8 miles an hour on Sept. 20. Flight Lieutenant J. N. Boothman won the Schneider Trophy permanently for Britain with an average of 340.08 miles an hour on Sept. 13.

Will Use Saskatchewan Coal

Contracts awarded by the Manitoba Government for heating buildings owned by the province this winter call for coal mined in Western Canada. Hon. W. J. Clubb, Minister of Public Works, has announced. The government is also continuing the policy of using cordwood wherever feasible with a view to furnishing employment to settlers in Manitoba bush areas. Alberta and Saskatchewan coal will be used.

Little Migration From Britain

Migration from Great Britain to the Dominions is not being encouraged and assisted passage schemes are in abeyance, apart from exceptional cases involving the reunion of families, it was stated in the British House of Commons by H. H. J. H. Thomas, secretary of state for the Dominions. Economic conditions throughout the Empire caused the shutdown in migration, he said.

Bernadine, which has always depended on rain for its water supply, is to have a fresh water system, as a result of ingenious engineering.

The woman always pays—if her husband doesn't forget to give her the money.

Big Wheat Movement

Grain Moving In Surprising Volume During Past Four Months

During the past three months wheat has been moving in international trade in a surprising volume, says a report of the Dominion Bureau of Statistics covering the world wheat situation. World shipments for August and October totaled 212,000,000 bushels, the highest for the same period in any year since 1920. The nearest approach to this volume for the same period in the past twelve years was in 1928 when the total was 184,000,000 bushels.

Canada and the United States shared in this movement to the extent of 65,000,000 bushels or 40.1 per cent. the Argentine 8.4 per cent, and Australia 10.7 per cent.

The early movement of Russian wheat this year, while disquieting at the time, the report says, has turned out to be a buoyant factor in the situation. "It is apparent," the report continues, "that the bulk of Russian wheat movement is over for this year, at the time when it was reaching its largest proportions in the fall of 1930. The supply situation for the last nine months of the present cereal year is more clearly defined than at any time during the past two years, and with Russia, at best an in-and-out exporter from now on, the supplies of Canada, the United States, Argentina and Australia, will be heavily drawn upon during the balance of the year."

The Canadian situation has been materially improved by virtue of the increased movement of wheat during the past three weeks, the report states. For the week ended November 6, export clearances of Canadian wheat amounted to 6,129,514 bushels, compared with 3,708,221 bushels for the week ended October 29.

Cause Of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain, and various other irritants may set up a trouble impossible to eradicate except through a special preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from the scourge of the bronchial tubes. It is sold everywhere.

Canada Never Defeated

War Spirit Should Actuate People In Time Of Depression

If Canadian citizens would face the present depression in the same way that citizens had faced war, Canada would be in an enviable position, declared Sir Arthur Currie, Canadian corps commander in the Great War, in the course of an address before the Queen's Own Rifles at Toronto.

Canadian troops in France had shown a willingness to work, a tranquil courage and an unselfish attitude towards each other and had never been known to quail in the face of any task. They had never given a thought to defeat, he said.

Unemployment had a demoralizing effect, and it was to be hoped that Canada had gone through the worst of the depression. "Honest labor is the secret of national progress," he maintained.

Saskatchewan Only Producer

The Ottawa Citizen of very recent date carries editorial comment on the production of sodium sulphate in Canada, a mineral now in demand in the copper and nickel industries and also in the manufacture of newsprint. The newspaper mentions that so far sodium sulphate is produced in only one province in Canada, Saskatchewan.

Testing Waters Of Ganges

Scientists Find Bacteria Which Kill Many Diseases

The belief of the Hindus that the waters of the Ganges have special life-giving properties has received confirmation from science. Experiments by scientists have shown that Ganges water contains bacteria which are able to attack—and kill—the germs of a number of diseases. The School of Tropical Medicine in Calcutta has been investigating these cultures of them may be obtained which will be of use in fighting disease.

International Bridge

Four Players On Ocean Liner Spoke Different Language

During an ocean voyage four passengers made up a game of bridge. One was a German, one an Englishman, one a Portuguese, and the fourth a Frenchman. Not one of them could speak the language of the others. Fortunately, an interpreter able to speak all four tongues was available, and he stood by and interpreted each call trivially. The game went quite well. Incidentally, the obliging and talented interpreter was a Pole by birth, though of German nationality by adoption.

Lovely Skin

Vegetable Pills Did What Creams Couldn't

"I find (writes Miss E. T. Chapman) that Carter's Little Liver Pills will do more to keep the complexion clear and the skin free from blemishes than all the face creams I have used." Dr. Carter's Little Liver Pills are so ordinary in nature. They are ALL-VEGETABLE and have a definite, vegetable tonic action upon the liver. They end Constipation, Indigestion, Bilelessness, Headaches, Acidity, All druggists. 25c and 75c red packages.

Cheap Meals In Berlin

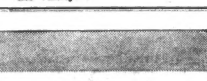

German Restaurant Keeper Content With Making Small Profit

"Quick lunch restaurants, where you can eat until you have enough and not be charged more than four, six or twelve cents for the meals you choose, have been opened in all quarters of Berlin, Germany, and are always overcrowded."

The owner is content with a minimum profit per meal in most cases not exceeding one or two pennings (one-fourth to one-half of a cent) and claims that his business is flourishing despite the low prices.

The normal yield of an acre of grain, the root of which takes 5 or 6 years to mature, is 2,000 pounds, valued at \$25,000.

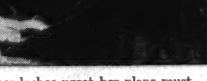

The smaller the man the greater his vanity.

HEADACHE

THE woman who lets headaches upset her plans must have her eyes and ears closed to certain facts about Aspirin. There is always swift comfort, and never any harm, in Aspirin tablets. Doctors have said so; men and women everywhere have found it so. Any headache—from any cause—is always relieved by one or two tablets. And lots of other aches and pains. Neuralgia. Neuritis. Rheumatism. Niggling pains. The pain from colds which make you "ache all over." Sore throat. Systemic or "muscular" pain. Aspirin can spare you lots of needless suffering! Be sure you get Aspirin—not a substitute!

Interesting Theory Is Held That Lunar Cycles And Sun Spots Have A Definite Effect On Weather

Foresters and hunters returning from the foothill district south and west of Edmonton report this year a tremendous increase in the number of field mice. Colonies of these little animals have reached such proportions that in some areas they are blamed with undermining large trees, leaving them with several roots and little foothold in the earth. In some instances it is stated that large trees have fallen in quite gentle winds. While experienced foresters doubt if the mice can be held responsible for felling timber, pointing out that many of the trees in the affected district are "over-mature" and likely to crash, they do agree that the mice are more plentiful. This they ascribe to the "cycle." Dr. Rowan of the university has, by observation, fixed this as recurring every four years. Rabbits, it is well-known, become plentiful every nine years, even to the point of overrunning whole districts, only to die off again in large numbers in the cyclic progression.

Scientists have been studying these strange cycles of abundance and yield. Only last summer a conference was held in the forests of Quebec, attended by experts from many countries. Attempts to connect the phenomenon with the eleven-and-one-half year sun spot cycle seem to have been abandoned as a result of the information there exchanged. Many animals follow the nine-year cycle. Every nine or ten years there is recorded a tremendous increase in their numbers, and then, just as suddenly, there, comes disease and they die by the millions.

Generally speaking, it was found that about every nine years there were times of abundant productivity in plant and animal life covering most of the North American continent. The increase or decrease in the animal life was found to begin in the far north and to work its way southward and northward, reaching southeastern Canada after three years or so. Some most interesting curves were presented by Dr. Ralph E. Delury, assistant director of the Dominion observatory at Ottawa. He pointed out that the cycle of nine and a half years is but little longer than the lunar cycle of 8.55 years and almost exactly half of another lunar cycle of 18.5 years. These two cycles of tidal activity may influence climate by stirring up ocean to the surface, and thus influence waters, allowing cold layers to come atmospheric pressure and storm areas. Dr. Edworthy Huntington supplied significant support for this lunar cycle of droughts and of agricultural productivity in the United States, with a period of 18.5 years when measured by the five cycles between 1837 and 1930. During the same time there have been six financial panics separated by five normal periods each of 18.4.

In his paper, Dr. Delury suggested that there are three influences controlling these cycles—a sunspot cycle of 11.2 years average and the two lunar cycles already referred to. He stated also that the yearly deviation of the earth's axis and its yearly revolution about the sun would provide a definite rhythm in life and climate. But even yet scientists are not ready to accept any explanation of cycles as final. They have been known and studied for hundreds of years. There was a cyclic law promulgated in India many centuries ago. Possibly in a few more centuries all cycles may be charted, their cause definitely discovered. Once that is done, predicting the future will be routine—but even then it is doubtful if all men will be ready to meet the rainy day.—Edmonton Journal.

Travelled Many Miles

Rounding out a service of more than 50 years, Guard Douglas D. Graham, of Carlisle, Scotland, has just retired. In that time he travelled more than 1,500,000 miles on railways. He was a guard on royal trains for 19 years. As he left the train at Carlisle on his last trip, officials of the road, who were aboard, congratulated him on his long service and gave him a hearty handshake.

Heat expanded one of the New York City bridges so much, on one August day this past summer, that the bridge could not be closed for 10 hours and 20 minutes.

An anthropological laboratory costing \$500,000 was recently opened in Santa Fe, N.M., to study the early days of mankind.

In the good old days a man's tonsils and his appendix were buried with him.

Place Men On Farms

Saskatchewan Government Has Plan To Assist Unemployed

Plans for the placing of single unemployed men on farms in the drought areas of Saskatchewan, under the government assistance scheme, have been adopted, according to Hon. J. A. Merley, Minister of Railways, Labor and Industries. Under this plan, provision is made for the government paying the man \$5 per month allowance and the farmer \$10 per month, in certain cases. Payment of such sums are governed by special circumstances.

According to department officials, approximately 1,000 applications have already been received, and they are arriving daily at the rate of nearly 200.

The scheme is instituted with a two-fold purpose; first, of supplying needy farmers in the dried-out areas with necessary help and, secondly, to obtain employment for qualified farm laborers at present unemployed in the urban centres of the province.

Regulations for the placing of single unemployed men on farms on a plan somewhat similar to those adopted for the placing of men are being prepared.

Coal For Wheat

Proposal That Canada Buy British Coal On Barter Basis

Lord Gairford, former president of the Federation of British Industries, stated recently that he contemplated the day when Canada might buy British coal in exchange for wheat on a barter basis.

He advocated the adoption of barter between Great Britain and Canada as a means of short circuiting difficulties arising out of currency complications and suggested Canada might import British coal on this basis rather than take 16,000,000 tons annually from the United States.

Winter Feeding Of Beef Herd

Feeding Should Be Largely Governed By Condition Of Cattle When They Go Into Winter Quarters

The kind and amounts of feeds used in the winter feeding of the beef herd should be governed to a large extent by the condition of the cows and young stock when they go into winter quarters. If they go into the winter in poor condition, due to a shortage of feed on pasture, grain should be added to the ration fed to the bred cows to get them into fair condition before calving, and also to cows nursing their calves if good condition on both cow and calf is desired. Cows in calf should not be allowed to run down in flesh, else they will be unable to produce vigorous calves and nourish them with a good flow of milk.

At the Dominion Experimental Station, Lacombe, Alberta, silage made from corn, sunflowers, or oats formed the principal part of the winter ration for the beef herd. Cows and calves relied it and thrive on it when some supplement is added. The silage has laxative properties which keep the digestive organs of the animals in good condition. The usual quantity of silage fed is about three pounds per day for each one hundred pounds of live weight. The silage is supplemented with a good hay (legume preferred) and other roughage, such as "oat hay" or green feed. The usual practice is to give the herd all the hay or green feed they will consume twice daily without unnecessary waste. If, however, hay is scarce or high in price the amount of hay is reduced and more silage fed.

In order to keep the young stock growing and thrifty, and the cows that are nursing calves up in condition, some grain is fed. Oats, which form the basis of the ration, is mixed with barley, a little bran, and at times, for high-class cattle, a little oil-cake meal. Grain rations for such young stock and cows will vary from one or two pounds per day up to six or eight pounds, according to conditions.

The breeding herd is turned out daily for exercise, except in stormy or unusually severe weather, in a yard which is sheltered from the prevailing winds. Water is always available in a trough with a tank heater and coarse salt is placed in boxes in the yard for the cattle to lick at will. — Lacombe Experimental Farm Note.

Bill Boards For Air Tourists
 The billboard curse has taken to the air after having adopted all of the scenery along the country's highways. A sign has been erected near the airport at Tulsa, Oklahoma, which is so constructed that "plane passengers can read its advertising message from the sky."

Chlorine was discovered in 1774 by Carl Wilhelm Scheele, a Swedish scientist, when he poured concentrated hydrochloric acid upon manganese dioxide.

JUDGE RETIRES

Mrs. Emily Murphy, the first woman to be appointed to the post of judge in the British Empire, has resigned from that position in Edmonton, Alberta. Mrs. Murphy has held the office for fifteen years.

Western Optimism

People Always Have Great Confidence In The Future

The proprietor of a western newspaper recently visited this part of the Dominion and on his return home dictated a private letter in which he said: "There isn't nearly the gloom out here that I found in the East. The next year confidence that is so characteristic of the West is a great possession for people to have in these times. Down East I found that many people were not looking into the future at all but wholly concerned about the present. Our people do not like present conditions, it is true, but they believe that the future is going to bring about an improvement." There never has been any question about the courage and resourcefulness of western Canadians. They have a wonderful agricultural country at their disposal and their industrial activities have become important. Their natural wealth in oil, coal, and basic metals is tremendous. Even the price of wheat shows signs of mending and mixed farming grows apace. The Canadian West cannot be restrained from coming into its own. The very many months will not roll round until it is again the scene of renewed prosperity.—Toronto Mail and Empire.

Synthetic Rubber

Discovery May Exert An Enormous Effect On The Rubber Industry

Fourteen years Nieuwland worked over his apparatus before his experiments bore fruit in an oil called divinyl acetylene. It was of no apparent value. To a layman it might seem slight reward for fourteen years of effort. But when chemists mixed this form of acetylene with salt and water they created a synthetic rubber that may exert an enormous effect on the rubber industry.

The science instructor who discovered the chemicals that make this synthetic rubber a commercial possibility is now the Rev. Julius Arthur Nieuwland. In announcing his achievement, officials of the Du Pont Company said that Father Nieuwland's share of the profits from the exploitation of the product will go to the Congregation of the Holy Cross, for when he was ordained he made a vow of poverty.

The quest for an artificial rubber, or for a substance that would fill the same purposes as rubber, has been carried on through years of research and the goal has been elusive. Because rubber is a vegetable product scientists have concentrated considerable effort and money on experiments with a variety of possible sources among common weeds and shrubs.

While Thomas A. Edison was testing an extract of dried and pulverized goldenrod, rubber chemists at the Bureau of Standards in Washington were examining by-products of cornstalks. A California botanist, Dr. William B. McCallum, runs an experimental factory near Sallman, where he tries to improve the product of the Mexican shrub guayule. The extraction of rubber from this plant was achieved thirty years ago, but its position as an American farm crop has been very recent.

But neither guayule nor goldenrod rubber can be considered as synthetic. Any exploitation of a natural plant product is likely to deter the quest for an artificial product. If petroleum could be used as a raw material for synthetic rubber it might hasten better times in the oil industry. The Russian Institute for Rubber Research is supposed to guard a secret process for making commercial rubber from crude oil; a similar experiment tried last year at the Bureau of Standards was without conclusive results. The bureau did succeed in obtaining crystalline rubber. Even if Du Pont's synthetic rubber attains commercial success, it will not discourage further research. Professor H. E. Simmons, of Akron University, recently said that such common farm products as wheat and potatoes may some day yield rubber; but he deplored the enormous waste of time and money in duplication of research in rubber laboratories and suggested a central institute in which all successful efforts should be combined.

—New York Sun.

Started Life At Bottom

The famous Sir Henry Royce, of Rolls-Royce, and designer of the engine that won the Schneider Trophy, relates that he began life by selling newspapers in the street. He is a remarkable man, and by the excellence of his work has caused the name of his firm to be used as a symbol all the world over for first-class in everything.

Back To The Land Movement Has Reached Heavy Volume During The Past Two Years

Geologists Find Traces Of Wealth

Report Following Field Work Survey Will Be Interesting

Field work in connection with the geological survey service of Canada is over for the year, all parties having returned to Ottawa to prepare their reports. Additional information respecting the vast stores of Canada's untouched mineral wealth will follow from these compilations, several of the groups having devoted themselves to the acquisition of data in that connection.

In northeastern Manitoba geological conditions of an area several hundred square miles in extent in the Oxford Lake district are declared to be favorable for gold prospecting. Dr. J. F. Wright carried out the survey in this region.

Keen search for new sources of this metal is in progress in British Columbia. Dr. G. Hanson

Emergency Relief Committee Named

His Excellency the Governor-General and the Prime Minister of Canada have announced a nation-wide campaign to be instituted for the purpose of securing funds with which to carry on an Emergency Relief programme throughout the Dominion, and the proposal has received the endorsement of His Honor the Lieutenant Governor and the Premier of Alberta.

A Provincial Committee has been appointed to take charge of this campaign, and it is desirable that the assistance of all the citizens of the Province be secured.

The proposal links the campaign with the Red Cross Society, so as to prevent the creating of a new organization, and the funds derived from this campaign will be administered by the Red Cross, with the advice and assistance of the Provincial Committee which is composed of the following members: Provincial Chairman, Col. James Ramsay; Provincial Secretary, E. J. Freeman, Esq.; District Executive, P. W. Abbott, K.C.; A. U. G. Bury, K.C., M.P.; D. M. Duggan, M.L.A.; Walter S. Campbell, H. W. B. Douglas, V. A. Porter, W. W. Provey.

The purpose of the appeal is to provide funds for extraordinary and emergency cases which cannot be dealt with under the present system of relief, and evidence has been submitted showing that this need is both urgent and great. The province has been divided into two districts, north and south, and the objective placed at \$100,000.

The intention of the Provincial Committee is to attempt to secure the co-operation of all residents of the province, and with a view to instituting an organization to further this plan in the Lacombe district, Mayor G. T. Jackson, called a meeting of representatives of all societies on Saturday, Dec. 5th. At this meeting the following committee was appointed: Chairman, Mayor G. T. Jackson; Secretary, L. P. Minkler; Executive, Rev. R. B. Layton, Mr. G. E. DeLong, Mr. P. Owen, Mr. W. Parker, Mrs. G. E. Mann and Mrs. C. E. Todd.

In this connection a meeting is to be held in the Town Hall on Saturday, December 12th at 2:00 o'clock, which the chairman of all school boards and U.F.A. leaders, U.F.W. A. leaders and W.I. Presidents are being asked to attend. It is hoped at that time to make all arrangements as to the most feasible plan of carrying on the campaign of the municipality.

Surely there is no need to stress the necessity for this appeal, for while Government measures are covering much of the need, there are special cases and situations in which a voluntary organization unhampered by red tape can act more efficiently and quickly than any official body. There was never a time when the voluntary work of the Red Cross organization was more necessary in Canada to meet distress and unemployment and their accompanying problems.

Anyone wishing to do so, may give his contribution by weekly payments as pledge cards will be used in collecting donations. Farmers may make donations of grain or other farm produce, according to their means, in which case, the elevator or creamery managers will cooperate by accepting any donations of this kind and reporting thereon to the local Committee.

After the meeting the Executive met and nominated the following as a general committee to meet and discuss ways and means: Jesse Fraser, Arthur Belcher, C. A. Sasseh, A. M. Campbell, P. E. McLeod, James S. McCormick, G. T. Jackson, George E. DeLong, P. C. Owen, Rev. R. B. Layton, John Gilmour, Clarence E. Todd, Lewis P. Minkler, Henry S. Todd, O. S. Young, William Parker, George W. Hand, A. Hall, O. W. Heppelheimer, F. J. Sissons, Fred Stewart.

It was moved by Reeve Parker, seconded by Mr. DeLong and carried: THAT the Committee meet in the Town Hall, Lacombe, at 2 o'clock Saturday, December 12, and that the secretary notify the Chairmen of the several School Districts in the Municipality of Crown whose boundaries are entirely therein, also the Presidents of all U.F.A. localities in the districts surrounding Lacombe, to be present.

RINK NOTES

Another week gone and our community rink was busy every night. "That's the spirit!" It was built by the people for the use of the people. "We agree with you, Abe."

Last Wednesday, Band night we saw the largest skating crowd enjoying the clean ice and snappy music that we have seen for years. Get out your skates—they want to go. "Meet me at the rink!" the popular cry reminds us of the old days in Tom Cumming's rink where all the line ones met 25 years ago. A lot of the skaters are asking "Where is Mrs. Doherty?" You have to have the Irish to make a real party. "Get your skates on Joe."

Our hockey team is shaping up nicely every night doing his stuff. "Spark Plug" Brooks is busy these days weighing up coal as near as he can; but still gets time to get the odd practice.

S. M. Murray, rink manager has orders for 8 or 9 pairs of skates and boots for little girls and boys who are without them and cannot buy them. Look in your basement and see if you have the following sizes. Boys and girls from size 1 to size 5. We have been outfitting play rooms in Tokyo, but about outfitting our own kids for this winter.

"Duckie" our fast right winger is going big this winter and packing a wicked shot—outside teams will have to watch him this winter.

"Big Shot" Weston who was moved from centre seems to be right at home in his new position. We have a real forward line with our old reliable Couer Calkins on left; "Big Shot" at centre and "Duckie" at right. You agree with us, don't you?

CAMROSE WINS FROM LOCAL TEAM 3-0

It was a somewhat disappointed crowd of hockey fans who witnessed the game Tuesday night between Camrose and Lacombe on the local arena. Not disappointed with the game, but disappointed because our team did not win.

Although the score is kind of lopsided, it was a good, fast game, and being early in the season (that is not an alibi) our team is not yet in first class shape. They will redeem themselves later on with no trouble at all. The Camrose aggregation played plenty of good hockey and deserved their win. They have a nice little team and should go far this winter in their class.

The first center did not come out all half way through the second period and the puck was a real nasty one to handle, the Camrose player getting past our right defence to send a sizzler from close in—this was a pretty goal. Shortly following this counter, another Camrose player took the puck right through our defence and shot from about ten feet out, giving Brebner, in goal no chance to save. From this goal on, Camrose certainly had their hands full holding back our fast forwards, who were firing burning up the ice and were peppering the Camrose net with shots from every angle. But our locals could not get a counter. The final goal came in the last stanza and try as it did, the Lacombe team was not destined to win, and the score at the final curtain draw 3 to 0 in favor of the visitors.

Stettler plays here tonight in the first game of the Big Five League, and from reports from the east, Stettler has a real good team. It is bound to be a fast game and our team is out to tuck away a victory, so be there. The game is called for 8:15—be there on time and give the boys your support.

THE NEW CHEVROLET

Considerable speculation was aroused this week by the appearance around town of posters, streamers and placards bearing the advice to "Keep Your Eye on Chevrolet."

What this leading manufacturer plans in the way of a follow-up to this preliminary announcement could not be learned from Hal Laird of Laird Motors Ltd.

"Tell any of your readers interested," Mr. Halpin, "to watch next week's edition of your newspaper for any further details. I can't tell you any more just now."

"We have done a fine business during the past twelve months and through many parts of the country Chevrolet is leading every other make in registrations. Yet, good as that showing is, we expect to do better during the coming months. Just keep your eye on Chevrolet," Mr. Laird concluded.

NEW MOVIE-TONE WESTERN

What has been acclaimed as one of the most thrilling and at the same time one of the most fascinating screen entertainments recently produced is "Fair Warning." For movie-tone great outdoor romance, featuring George O'Brien, which opens today at the Avalon Theatre.

O'Brien is back again in his followers' favorite type of role, that of a fighting, hard-riding Westerner. In his newest role he portrays the role of "Whistlin' Dan Barry, a man close to nature with an uncanny control over wild animals."

For those who desire to see the latest in feminine pulchritude, O'Brien's newest leading lady, Louise Huntington, recently of Broadway brightlight, makes her talking screen debut.

Based on Max Brand's widely read book, "The Untamed," this picture was directed by Alfred L. Werker, whose previous efforts include "Last of the Duanees." Prominent in the supporting cast are Mitchell Harris, George Brent and Nat Pendleton.

This is Family Week. The whole family \$1.00.

Coming "Skipty." Rated 4 stars by Liberty. Dec. 17, 18, 19.

"Min and Bill" Dec. 24, 25, 26.

OF INTEREST

St. Andrew's Christmas Tree will be held on Tuesday, December 22nd.

For your Radio poles. Apply Chas. Graham at Park's Garage.

The Woody Nook School School Entertainment and Christmas Tree will be held Wednesday, Dec. 23rd at 8:00 p.m.

T. Wilkes, Secy.
If it is a Christmas Gift for a man, the most logical place to get it is at Dave Hays' ("The Man's Store"). Dave has just opened up a fine assortment of gifts for men, such as Ties, Socks, Scarves, Shirts, Sweaters, etc., in fact everything in the line of men's wear. Each article is fine up in a neat Christmas box. Call around and see for yourself.

BORN—at Lacombe Hospital, Dec. 3rd to Mr. and Mrs. Gordon Brown, (nee Harriet Walters) a son. Ronald Gordon.

\$1.50 allowed on any old lamp or lantern. Until Dec. 15th we will allow \$1.50 for any coal oil lamp or lantern on the purchase of a Coleman Lamp or Lantern. Morrison and Johnston, Ltd.

The bazaar held on Friday evening by the Young Women's Auxiliary and the C.G.I.T. groups, was most successful, practically every article displayed having been sold and a tidy sum realized. The young ladies wish to thank all, who by their patronage, contributed to this success.

Unique Personal Photo Greeting Cards, from your own films. Prints 15c. and 20c. each. Colored in oil, 25c. each. Cameron's Studios.

The Catholic Ladies Aid will hold their bazaar, December 12th in the Adelphi Hotel rooms. Tea served from 3 to 6 o'clock.

Let Dave Hays help you to select that gift for "Him" that is worrying you. Having years of experience in men's wear, he has now in stock a line of goods that are sure to make your selection easy. You will have no trouble getting the gift that will please him most—Dave will have it right there.

Save the worry of shopping for personal gifts. There's no gift so personal as your photograph, because it's you. Cameron's Studios.

At the annual meeting of the W.I. held Saturday afternoon at the home of Mrs. Fred Taylor, reports were received and the following officers elected: President, Mrs. T. Robert; Vice-President, Mrs. J. Sherrer; Secretary, Mrs. W. Newton; Directors, Mrs. A. Brande, Mrs. W. Toward, Mrs. R. Hoppus, Mrs. J. Paul and Mrs. W. Cranna. Committee convenors were: Legislation, Mrs. T. Robert; Immigration, Mrs. A. French; Education, Mrs. J. Sherrer; Home Economics, Mrs. J. Paul; Health, Mrs. C. E. Todd; Canadianization, Mrs. H. Reed; Agriculture, Mrs. J. Craigie; Social, Mrs. A. Jenkins; Canadian Industries, Mrs. R. Saunders; League of Nations, Mrs. E. Hunter. Delegate appointed to attend the National Emergency Relief meeting was Mrs. C. E. Todd. A quilt made by the W.I. was presented to the Central Relief committee. Mrs. Pringle and Mrs. Hoppus presented the December installment of the serial story and the January number is to be given by Mrs. Sherrer and Mrs. H. Reed.

The Women's Missionary Society will meet at the home of Mrs. C. E. Todd on Tuesday, Dec. 15th.

**DIFFERENCE IN COST ONLY
1¢ PER DAY
FOR FAMILY OF FOUR**

Is The Flour You Use? In the modern Milled From Washed Wheat? plants of Robin Hood Mills the wheat is first screened to remove all straw, sticks, insects, weed seeds, etc. Powerful air suction removes the finer particles of dust and foreign matter—next the wheat is scoured in special washing vats. More than 100,000 gallons of water are used every 24 hours by each wheat washer. The DIRT is carried away like MUDDY WATER from a scrubbed back porch. Then a rinsing of fresh water leaves the wheat bright and CLEAN.

Is the flour you use milled from Washed Wheat? Is it fit for consumption on your table? Remember... the difference in cost between CLEAN, PURE Robin Hood flour, and cheap, poorly milled flour is only 1¢ PER DAY FOR A FAMILY OF FOUR.

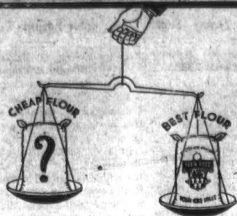

IS THE SAVING WORTH WHAT IT COSTS IN HEALTH RISK, QUESTIONABLE PURITY, UNAPPETIZING FLAVOR AND POOR FOOD VALUE?

Robin Hood FLOUR

CLEAN --- PURE

MAKES MORE LOAVES --- BETTER BREAD --- BIGGER FOOD VALUE

A.P.P. NEWS

Theodore Draper, from Condon, Alberta, escaped from the Mental Hospital, Ponoka, on Friday night at 9:30, he was picked up by Const. English at Morningside, at 1:00 a.m. He left the hospital with his regular hospital clothing on, but when he was picked up he had nothing on except a suit of combination underwear and one shoe and stocking. He was taken back to Ponoka immediately.

J. B. Moore, of Alx appeared before Magistrate Jones, on Saturday, December 5th charged with reckless driving, pleaded guilty and was fined the usual \$15.00 and costs. Const. English prosecuted.

Edward Larson, near Bentley appeared before Magistrate Jones on Wednesday, Dec. 9th, charged with causing a disturbance in a public place and was fined \$15.00 and costs. He was also charged with having liquor at a place other than his private residence and was fined on this charge \$20.00. He was arrested by Const. English, when the report of the disturbance at a dance hall just west of Blackfalds was sent in.

SUCCESSFUL SALE

The sale of range horses held at stock yards on Tuesday by James Gordon, J. McLellan and MacKenzie Bros. was very well attended and brought very fair prices considering they were mostly unbroken stuff.

In all there were of head sold at an average of \$19.00. Although not high will give purchasers a chance to make some money, besides getting into younger horses for the farm.

Mr. Gordon sold two carloads by Auction at Olive last week and the purchasers were well satisfied and could easily place two or three cars more of the same kind he had there.

There is a growing demand for young horses by the farmers. They have been selling off their fitted horses at our Annual Horse Sale and now need young ones to replace these and to take place of the tractor.

NOW FOR YOUR CHRISTMAS CAKE

To help out on the funds necessary to successfully carry out the program of the Lacombe Poultry and Pet Stock Association, to be held in Lacombe on December 29th and 30th, Avery Bros. Lacombe Bakery, are offering a large Christmas cake, which

FIVE ROSES FLOUR

"THE WORLD'S BEST"

To obtain the very highest quality and the surest, finest results, insist on "Five Roses."

Good cooks all over Canada rely on this flour to make perfect cakes, pastries, puddings and breads.

FOR SALE AT

English; 2nd Vice-President, Mrs. J. Finlayson; 3rd Vice-President, Mrs. John Gilmore; Secretary, Mrs. R. Ransome; Treasurer, Mrs. P. D. Locke; Sick Committee, Mrs. R. B. Layton, Mrs. Pillman and Mrs. J. N. B. MacDonald; House Committee Mrs. John Gilmore and Mrs. J. Fraser; Social, Mrs. F. E. McLeod and Mrs. J. L. Carter; Kitchen Convener, Mrs. A. French; Lunch convener, Mrs. J. Finlayson.

GOVERNMENT ASKS HOTEL KEEPERS TO HELP
The following request to hotel keepers has been sent to all hotels in the Province.

"The unemployment and economic conditions continue to be major problems confronting the people of Alberta, and the board is particularly anxious that all licensees co-operate to the fullest extent with government and municipal authorities to eliminate, or at least to minimize, the hardships created by those persons receiving relief who attempt to spend their small earnings on liquor."

"We reiterate our request of last year that all hotelmen in the province use every effort to discourage any of the following abuses developing on their premises."

"Men drinking in the beer-rooms who are directly or indirectly receiving relief from any relief or charitable organization; men who are known to be having difficulty providing the necessities of life for their families; serving men who are leaving their families in want and spending money on liquor; serving men who persist in drinking to excess or who show an inclination to remain in the beer-room indefinitely."

WORLD HAPPENINGS
BRIEFLY TOLD

Alberta Einstein will go to the United States soon to resume his studies at Mt. Wilson Observatory.

Canada still ranks third as a supplier of butter to Japan, the Dominion supplying 140,226 pounds valued at \$62,000 in 1930.

About 15 unemployed men have been sent to Churchill to supplement the skeleton force as caretakers and watchmen this winter.

Dedication of the proposed international peace garden in Manitoba and North Dakota, will probably take place in July, 1932.

Tests of Alberta coal to ascertain the possibility of obtaining petroleum from the product have been completed by Dr. E. H. Boomer, of the University of Alberta.

A committee of Chinese residents in Victoria state that all their dealings with Japanese in Vancouver to the extent of \$500,000 have been boycotted.

Mrs. Thomas A. Edison, widow of the inventor, has approved a plan for a \$10,000,000 world memorial to her late husband.

Fifty million dollars, needed to keep South Africa on the gold standard, will be raised through London by the Union Government and commercial banks in co-operation.

Peru has informed the League of Nations that it accepted the one-year armaments building holiday proposed by the League. This brings the number of adherents to 40.

The great Yukon River stopped running on November 17, with the temperature at 27 below zero. The main river and all tributaries are frozen over solid, to remain so until next May.

The tale of Man has made known its desire to adopt a national flag and the governor has been asked to take steps to procure the assent of the British Government. The only Manx flag which now approaches a national status is a red ensign bearing three human legs.

Frequent Coal Mine Accidents

Take Lives of 100 Men Monthly in United States

Too much important news is in the air for many of us to pay attention to the burial of six more coal miners in a gas explosion near Wilkesbarre, Pa. Four were dead when rescuers reached them, and only two were saved.

Despite safety campaigns, more than 100 men are being killed each month in American coal mines. Coal mine accidents killed 107 men in September, 112 men in August. In the first nine months of 1931, the toll was 1,076 miners.

For every million tons of soft coal mined three miners must give their lives, for every million tons of anthracite six must die.

Lipton's Home Simple

Was Furnished Fifty Years Ago and No Change Made

Osidge, which under the will of Sir Thomas Lipton, is to become a hostel for nurses in memory of his mother, shows eloquently in its furnishing how truly a bachelor's home it was. It is said fifty years ago a big furnishing house equipped it for the rising young merchant. It remains very much today as it was then. Unlike many self-made men, Sir Thomas was no great collector of pictures. He never acquired knowledge of them and did not pretend. His collections at Osidge that matter are an array of yachting cups and a roomful of letters. Many are from very distinguished people.

Fish For Manitoba Lakes

Millions Of Whitefish Spawn Will Be Distributed In Waters Next Spring

The lakes of Manitoba will be replenished with many millions of whitefish next spring if spawn collected by the game and fisheries branch of the provincial government catches up to expectations. The latest accumulation of whitefish spawn gathered from the Dauphin River spawn camp, includes 61 million eggs. Of this, 21 million eggs were shipped by Canadian National express to the Winnipeg hatchery and the remainder were placed in the provincial hatchery at Gull Harbor on Hecla Island, Lake Winnipeg.

Some men make a specialty of posing as horrible examples.

"Have you noticed what lovely hands she has?"

"No wonder, when she is always at a chiropodist's." — Le Moustique, Charleston.

Pre-Winter Fire Prevention Drive

Hon. J. F. Bryant Issues Appeal To Residents Of Saskatchewan

Making a final drive to stir Saskatchewan residents to concerted pre-winter fire prevention activities, in order that premium rates on fire insurance might be reduced, Hon. J. F. Bryant, K.C., Minister in charge of fire prevention in Saskatchewan, has issued the following appeal to the general public:

"In view of the large increase in the number of fires in Saskatchewan, and the fact that the high premium rates on fire insurance are the result of past experience in the matter of fire losses, where the lack of care of the many adds to the burden borne by all who insure their property against loss by fire, I venture once again to suggest to the householders of Saskatchewan the desirability of checking up once more on the heating systems before the winter season settles in, in order to assist in keeping down the fire losses in Saskatchewan during the winter months.

"A survey recently conducted by the Wisconsin Industrial Commission discloses the fact that approximately one-fourth of the State's losses of \$10,000,000 per year was due to heating plant defects and neglects. Defective chimneys, burning out of clean chimneys, woodwork embedded in or in contact with chimney walls, rusted stove pipes, pipes too near unprotected woodwork, and placing of ashes in cardboard or wooden containers, were the main causes of these needless losses.

"A few minutes' attention to removing these causes, and a few cents spent on new stove pipes, or on asbestos or zinc protection when the stove or furnace is near the woodwork, will save many Saskatchewan homes this winter. One Saskatchewan home was burnt down every day last year. See that your home does not go next!"

Armament Truce

One Year Truce Goes Into Effect As From November 1st

A one year truce in armament construction, dating from November 1, went into international effect on the authority of Chairman Aristide Briand, of the League Council.

An announcement from the League secretary, under Mr. Briand's signature, said that some 50 governments had declared their willingness to accept and consequently the truce had become an established fact.

A number of governments made their acceptance conditional on reciprocity, it was pointed out, and much reciprocity had been achieved. Many replies were said to have contained interpretations and observations, but all appeared to be in keeping with the spirit of the League's resolution. The leading powers participating are Great Britain, the United States, France, Italy, Germany, Japan and Russia. Others are Argentina, Uruguay, Peru, Finland, Bolivia, Belgium, Denmark, Chile and Poland.

The League Assembly adopted a resolution at its final meeting on September 29, calling on the governments invited to the 1932 disarmament conference to "give proof of their desire for a successful issue of efforts to insure and organize peace, and to refrain from any measure involving an increase in armaments."

The fact that the truce has been made effective is interpreted as an optimistic augury for the success of the arms meeting in February, and as counteracting to some extent the warlike situation existing in the Far East.

American Star Farmer

Young Farmer From Arkansas Awarded \$1,000 Prize

A young Arkansas farmer who worked his way through school on a rented cotton plantation was named at the American Royal Livestock and Horse Show as "the star farmer of America." He was awarded a \$1,000 prize.

To Gren Farrow, 22 years old, of Danville, Yell County, Arkansas, went the highest honour presented by Future Farmers of America, an organization of 60,000 youths whose purpose it is to develop scientific farming in every section of the south-west.

Meteor Display

Scientists Watch Brilliant Shower While Travelling In Aeroplane

Scientists, using an aeroplane as an observatory, recently saw what probably was the greater shower of the age-old Leonid meteors since the historic display of 1866.

It was the "hit show" of the universe, coming only once in every 33 years and first seen just a thousand years ago. The meteors were nine men, including Dr. Paul W. Merrill, noted astronomer of the Mount Wilson Observatory, Pasadena, Cal., who sat in a night plane and watched as they flew from Salt Lake City to Los Angeles.

About one-fourth of all twins are identical twins, so much alike that they can scarcely be distinguished.

BROWN: "I must apologise for coming in ordinary dress."

HOTSPICE: "Oh, please don't. We are all looking more idiotic than usual—and you are not." — The Humorist, London, England.

Dirigible Scrapped

Dismantled R-100 Being Sold For Scrap Metal

The dirigible R-100 is being sold for scrap metal, the British Air Ministry has announced.

The R-100 cost more than \$2,000,000. What she is bringing was not disclosed.

The dirigible made only one notable flight, from England to Canada in the summer of 1930.

Ever since the R-101 disaster over France, October 5, 1930, in which almost 50 persons were killed, there has been agitation against the use of dirigibles in the air force. Several times the question came up in the House of Commons.

When Viscount Philip Snowden, who was recently raised to the peerage, introduced his last budget, he announced that the R-100 would have to go. Economy was the reason. Only the motors and fabric will be retained.

The dirigible was completed November 28, 1929. Aside from her Canadian trip she made few trips except on test journeys over England.

Nothing Doing

Macpherson was changing his boarding-house, and when he arrived at the new one the landlady showed him to his room.

"Looks comfortable," said Macpherson.

"Yes," went on the woman, "most people admit I've made them comfortable here. I've always had a gift for doing that."

"Is that so?" asked Macpherson, doubtfully. "Well, ye needsn't expect one free me."

Use of buses in Spain is rapidly increasing.

Knighthood For Noel Coward

Noted Actor May Be Recipient Of Honor From King

Word comes from London that Noel Coward—playwright, composer, actor—may be the recipient of a knighthood from the King, this being regarded as somewhat surprising. It is difficult to understand the surprise. If brewers and others of their kind may be permitted to kiss His Majesty's sword, it is difficult to see why the privilege shouldn't be conferred on a man like Noel Coward.

He has become, for the British stage, what Sir Edward Elgar is to British music, and his recent production "Cavalcade," now performing at the Old Drury Lane, and recently witnessed by the King, is said to be a patriotic panorama of British history that could scarcely be excelled.

In the circumstances, and considering the part that the British stage has played in British history, from Shakespeare right down to Bernard Shaw, a knighthood for Noel Coward would scarcely dishonour that oft-abused institution. For our own part, we have always loved Noel Coward since his immortal remark about Michael Arlen, Coward, having read one of Arlen's "confessional books," described him as being "every other inch a gentleman."—Ottawa Journal.

Mistress: "I'd like to give you a good reference but you have never been punctual with the meals."

Maid: "Well, say. She prepared the meals with as much punctuality as she received her wages."

When it comes to making a swift touch the glad hand is very much in evidence.

FASHION

No. 596.—Paris Favourite. This style is designed in sizes 14, 16, 18, 20 years. Size 16 requires 4 1/2 yards of 39-inch material with 1 1/2 yards of 2-inch lace banding.

No. 624.—School Girl Frock. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 1 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting.

No. 275.—Smart Costume Slip. This style is designed in sizes 16, 18, 20 years, 36 and 42 inches bust measure. Size 36 requires 3 1/2 yards of 35-inch material with 2 yards of binding.

No. 997.—Cute Bolero Dress. This style is designed in sizes 8, 10 and 12 years. Size 8 requires 1 1/2 yards of 35-inch material with 1/2 yard of 35-inch contrasting.

No. 487.—Boudoir (Flapper) Doll Dress, Jacket, Bonnet and Muff. Cuts in one size for a doll 28 inches tall. It requires 3/4 yard of 38-inch material with 3/4 yard of 27-inch lining for jacket and bonnet, 1 1/2 yards of 38-inch material for dress and 1/2 yard of 4 1/2-inch fur for muff and cuffs.

No. 947.—Princess Model. This style is designed in sizes 14, 16, 18, 20 years. Size 16 requires 4 1/2 yards of 39-inch material with 1 1/2 yards of 2-inch lace banding.

Winter Cruises To Sunny South

Intiguing Programme Of Sailings Arranged By The Cunard Line

An extensive winter cruise programme of twenty-seven cruises, including ten "Millionaire" cruises to the West Indies, eight to ten days in duration; eleven cruises to the West Indies varying in length from four to twenty-three days; four cruises to the Mediterranean; one cruise to Mexico and South America and a cruise around the world, is announced for the Cunard Line by Arthur Standley, general manager of the Cunard Line in Canada.

The "Franconia" will set sail on her annual world cruise on January 9th, returning to New York on March 27th after having visited a large number of ports never visited by any other world-cruising liner.

Four cruises to the Mediterranean and the Caribbean commencing with the sailing of the "Mauretania" from New York on December 18th. She will be followed in January by the "Transylvania." On February 4th, and March 6th, the "Aquitania" will make two cruises to the Mediterranean from New York.

The "Samarina" will make the Mexico-South America cruise of fifty-seven days, and passengers will find "75 varieties" of new scenes and sights on this cruise. The "Samarina" will sail on February 6th.

The West Indies cruises will be carried on by the "Mauretania," "Franconia," "Aquitania," "Scythia," "California" and "Berenagata," commencing with the sailing of the "Mauretania" on November 18th and finishing with the "Scythia" when she sails from New York on April 16th.

The "Millionaire" cruises will be handled by the "Transylvania" and the "Caledonia." Both these ships will make the first of the cruises on December 24th and the "Caledonia" will make the last on April 22nd.

Besides, all these cruises a regular weekly service will be maintained between New York and Bermuda with a call at Nassau by the "Scythia," "Carinthia," and "Caledonia."

The gigantic cruise programme indicates the trend of the times for short holidays in the winter months to the sunny climes of the south and the bookings already indicate a most successful season.

Leaning Tower Of Pisa

Steps Being Taken By Italian Government To Preserve Old Structure

A leaning structure whose parts are firmly bound together will continue to stand so long as a vertical line drawn through its centre of gravity passes within the base. A commission appointed by the Italian Government found that the inclination of the tower at Pisa was about sixteen feet and that the inclination was increasing at the rate of about one-third of an inch in ten years. At that rate in about 300 years the inclination of the tower would increase to such an extent where the line of gravity would fall outside the supporting foundation and the walls would begin to fall. Steps are being taken to reinforce the soil around the foundation by the gradual injection of hardened material such as cement.—The Pathfinder.

Grading Helps Exports

Standardized Grading Of Eggs Has Been Of Great Benefit

Dependable quality is an advantage in the export market. During the past year, from October 1930 to October this year, exports of eggs from Canada to Bermuda have held steady despite the advantage of lower prices enjoyed by competing export product. This is a fine indication of the value of standardized grading for eggs and also of the beneficial of government inspection of export eggs. Canadian exporters have secured the confidence of the Bermuda market in the quality of their product and the reliability of our grades. The same is true with respect to the export of eggs to Newfoundland, where quality is winning confidence with the result that important new markets for Canadian eggs are developing.

May Be World Record

Canadian Pilot Spent 926 Hours In Air During Year

Claiming an all-time record for Canadian pilots, officials of the Brokers Airways, Limited, of Prince Albert, announced their chief pilot, Capt. B. W. Broatch, in the 12 months since October 9, 1930, has spent 926 hours in the air carrying 600,000 pounds payload and about 1,600 passengers.

The freightage was done in bringing fresh fish from Lac la Ronge last winter and in carrying cargoes of various sorts into Tassota, Ontario, this spring. This summer Broatch was on duty as a patrol in northern Saskatchewan. Province officials believe this may be a world record.

Trying New Phone Service

A new telephone service on trial in Holland permits from three to six persons to talk with each other over a telephone at one time. The new service is finding a wide use in commercial and public quarters, where conferences can be held and agreements arrived at without going from the office.

Most people would fail short if measured by the golden rule.

Inter-Empire Trade

Premier Told Of British Columbia Will Re-submit Proposals To British Government

Premier S. F. Tolmie of British Columbia, will re-submit to the British Government the proposals that he made in 1929 at the request of Rt. Hon. J. H. Thomas, for a development of inter-empire trade. The changes that have taken place since that time in the sentiment in Great Britain towards protection, and the demand of the nation for a new economic arrangement, coupled with the announcement that the minister for the Dominions will shortly start on a tour of investigation of empire trade, Premier Tolmie believes, justify him in seeking further consideration of the suggestions he made two years ago.

While his memorandum to the British Government dealt primarily with the development of trade between British Columbia and United Kingdom, it was pointed out that such a policy as suggested was applicable to the whole of the empire.

"It is my intention," said Premier Tolmie, "to write to Mr. Thomas and respectfully call his attention to the memorandum, and request that it be given further consideration in the light of the developments that have taken place since it was first submitted."

A Great Indian Traveller

Sir Jehangir Kothari Has Been Round World Ten Times

One of the world's greatest travellers recently arrived in London, England. He is Sir Jehangir Kothari, an immensely rich Indian merchant who rendered valuable services to the Empire during the war. He has been round the world ten times, and has made several journeys into the wastes of the Arctic, as well as to the cannibal islands of the Pacific. His travels have involved him in many adventures. As a boy he was rescued from a sinking boat at sea. He was in Yokohama during the disastrous earthquake of seven or eight years ago, and on his next visit to Japan he witnessed the great fire at Kobe. Soon after the outbreak of war he subscribed £15,000 to the War Loan in his own name, and maintained at his own expense a large staff engaged in war work. His home is in Karachi, to which city he has been a generous benefactor. He was knighted in 1921.

Prefer Canadian Ports

United States Shipper Finds Costs Cheaper On West Side Of The Line

The possibility that Canadian ports will be used in future in preference to United States ports as a shipping centre for cattle and horse shipments to Europe, was foreseen by William R. Rowe, a leading American cattle exporter. He was in Quebec supervising the loading of twenty-eight sample head of American mules consigned to the Italian Government for army purposes.

Mr. Rowe said he found that even with the longer rail haul to a Canadian port, transportation costs were reduced considerably, resulting from a much lower cost of Canadian feed.

For Close Decisions

A two-eyed motion picture camera will back up the work of human timers at the 1932 Olympic games in Los Angeles. One eye records the movements of a stop watch and the other catches the finish of the races. An electric attachment to the starter's gun sets the watch in motion.

What many young husbands would like to know is how the preacher learned to tie the matrimony knot so that the wives get all the rope.

Canada's Biggest Industries

Statistics Show Pulp and Paper Manufacturing Heads List

The Dominion Bureau of Statistics has just completed its report on Canada's largest manufacturing industry, the pulp and paper business, for 1930. Like the leading industry of the United States, which is the manufacture of motor cars, Canada's premier industry has been passing through a difficult period. Yet the value of its output in 1930, while smaller than the previous year, was only a reversion to the 1926 figure. The fact is that many of our industries have, even in these times of depression, an output which would have been considered something to be proud of not so many years back in Canadian history.

The "big five" on a basis of production value are apparently the pulp and paper mills, the flour and grist mills, the slaughtering and packing houses, the central electric stations and the motor car factories. The central electric stations, whose growth has been greatly accelerated by the expansion of the pulp and paper industry as well as by the increasing general use of electricity, represent by far the largest investment of any Canadian industry—over \$1,000,000,000. If salaries and wages paid were the basis of comparison, the "big five" would be a somewhat different group; pulp and paper, sawmills, railway rolling stock, automobiles, and castings and forgings. Central electric stations are probably in sixth place, with printing and publishing in seventh.

As already pointed out, pulp and paper production in 1930 was merely a reversion to the 1926 figure. Slaughtering and meat-packing production was better than in 1929; automobile manufacture, better than in 1924. What Canadian industry has done has been to step back a few years from the peak of 1928, but it does not do to suppose that the resulting condition is one of chaos. After all, even today's production would have been considered something to boast about a few years ago.

MACDONALD'S File Out

with ZIGZAG papers attached

THE HOUSE OF DREAMS-COME-TRUE

— BY
MARGARET FEEDER
Author of
"The Solitary Path," "The Heart
of a Hero," "The Heart of a Hero,"
Hodder & Stoughton, Ltd., London.

CHAPTER VI.—Continued.

"You know perfectly well what I meant," she answered, a tremor born of anger and wounded feeling in her voice. "You thought I was inquisitive—trying to find out your name."

"Well—humorously—'you were, weren't you?' Then, as her lip quivered sensitively, 'Ah! Forgive me for teasing you! And—more earnestly—'forgive me for not telling you my name. It is better—much better—that you should not know. Remember, we are only here this one day together; we're just 'ships that pass in the night.'"

There was an undercurrent of deep sadness in his voice, the steadfast, submissive sadness of a man who has long ago substituted endurance for revolt.

"Remember, we can only have this one day together." The quiet utterance of the words stung Jean into a realization of their significance, and suddenly she was conscious that the knowledge that this unknown Englishman was going away—going out of her life as abruptly as he had come into it—lilted her with a quite disproportionate sense of regret. She found herself unexpectedly up against the recognition of the fact that she would miss him—that she would like to see him again.

"Then—you want me to forget?" she asked rather wistfully.

Her eyes fell away from his as she spoke.

"Yes," he returned gravely. "Just that. I want you to forget."

"And—'you?' The words seemed dragged from her without her own volition.

"I? Oh—he laughed a little—"I'm afraid I'm inconsistent. I'm going to ask you to give me something I can remember. That's all I want."

"If you forget and I—remember."

"What do you want me to give you?"

He made a sudden step towards her. "I want you to give me something—just one. Will you?"

He waited for her reply, his keen, compelling glance fixed on her face. Then, as though he read his answer there, he stepped to her side and held out his arm.

"Come," he said.

"Almost as if she were in a dream, Jean laid her hand lightly on his sleeve and he pulled aside the portiere for her to pass through. Then, putting his arm about her, he swung her out on to the smooth floor of the 'salon'."

They danced almost in silence. Somehow the customary small-chance of ballroom conversation would have seemed irrelevant and apart.

This dance—the Englishman had implied as much—was in the nature of a farewell. It was the end of their stolen day.

The band was playing "Valse Triste," that unearthly, infinitely and vision of Sibylla's and the music seemed to hold all the strange, breathless ecstasy, the regret and foreboding of approaching end of which this first, and last, dance was compact.

CHAPTER VII.

Which Deals With Reflections

The dawn of a new day possesses a curious potency of readjustment. It is as though Dame Nature, like some automatic old nurse, wakes us up and washes and dresses our minds afresh for each morning, so that they come to the renewed consideration of the affairs of life freed from the influences and emotions which were clogging their pores when we went to sleep.

Not infrequently in the course of this species of mental ablution, a good deal of the glamour which invested the doings of the previous day gets scrubbed off, and a new and not altogether pleasing aspect of affairs presents itself.

This was somewhat Jean's experience following that of the fancy-dress ball. Looking back upon the events of the previous day, it seemed to her now that the tubbed, maternal mind almost incredible that they should have occurred. It was like a dream—like itself tricked out in fancy dress.

Stripped of the glamour of romance and adventure which the unknown Englishman had contrived to clothe it, the whole episode of the day together presented itself as disagreeably open to criticism, and the memory of that final scene in the cave sent the blood flying to her cheeks. She asked herself in mute amazement how it was possible that such a thing should have happened to her—to "our chaste Diana," as her father used laughingly to call her in recognition of the instinctive little air of aloofness with which she had been wont to keep men at a distance.

It was over at last. The three final chords of the "Valse"—Inexorable Death knocking at the door—dropped into silence, and with the end of the dance upon the eager hum of gay young voices, as the couples drifted out from the hall, in search of the buffet or of secluded corners in which to "sit out" the interval, according as the spirit moved them.

Jean and her partner, making their way through the throng, encountered Madame de Varigny on the arm of a handsome Bedouin Arab. For the fraction of a second her eyes rested curiously on Jean's partner, and a gleam of something that seemed like triumph flickered across her face. But it was gone in an instant, and, murmuring some commonplace to Jean, she passed on.

"Who was that?"

"The Englishman rapped out the question abruptly and Jean was struck by an unaccountable note in his voice. It held apprehension, distaste; she could not quite analyse the quality.

"The Cleopatra, do you mean?" she asked. "That was my chaperon, the Comtesse de Varigny. Why do you ask?"

He gave a short, relieved laugh.

"No particular reason," he returned with some constraint. "She reminded me—extraordinarily—of someone I used to know, that's all. Even the timbre of her voice was similar. It startled me for a moment."

He dismissed the matter with apparent indifference, and led Jean again into the same little alcove in which he had found her. They stood together silently in the dim, rose-hued twilight diffused by the shaded lamp above.

"Well," he said at last, slowly, reluctantly, "this is really the end of our stolen day."

Jean's hands, hanging loosely clasped in front of her, suddenly tightened their grip of each other. She felt herself struggling in the press of new and incommensurable emotions. A voice within her was crying out rebelliously: "Why? Why must it be the end? Why not—other days?"

Pride alone kept her silent. It was his choice, his decision, that they were not to meet again, and if he would so compassedly choose the limits of their acquaintance, she was far too sensitively proud to utter a word of protest. After all, he was only the comrade of a day. How—why should it matter to her whether he stayed or went?

"I always believe"—the Englishman was speaking again, his eyes bent on hers—"I always believe that, no matter how hard or tragic people's lives may be, God will give them some magic moment—so that they may believe in heaven. . . . I have had mine today."

"Don't you—believe in heaven?"

He laid his hands lightly on her shoulders.

"I do now. I believe . . . in a heaven that is out of my reach."

His hands slipped upward from her shoulders, cupping her face, and for a moment he held her so, staring down at her with grave, inscrutable eyes. Then stooping his head, he kissed her lips.

"Good-bye, little comrade," he said unevenly. "Thank you for my magic moment."

He turned away sharply. She heard his step, followed by the quick, jarring rattle of brass rings jerked violently along the curtain-pole, and a moment later he was gone. With a dull sense of finality she watched the heavy folds of the portiere swing sullenly back into their place.

CHAPTER VIII.

Which Deals With Reflections

The dawn of a new day possesses a curious potency of readjustment. It is as though Dame Nature, like some automatic old nurse, wakes us up and washes and dresses our minds afresh for each morning, so that they come to the renewed consideration of the affairs of life freed from the influences and emotions which were clogging their pores when we went to sleep.

Not infrequently in the course of this species of mental ablution, a good deal of the glamour which invested the doings of the previous day gets scrubbed off, and a new and not altogether pleasing aspect of affairs presents itself.

This was somewhat Jean's experience following that of the fancy-dress ball. Looking back upon the events of the previous day, it seemed to her now that the tubbed, maternal mind almost incredible that they should have occurred. It was like a dream—like itself tricked out in fancy dress.

Stripped of the glamour of romance and adventure which the unknown Englishman had contrived to clothe it, the whole episode of the day together presented itself as disagreeably open to criticism, and the memory of that final scene in the cave sent the blood flying to her cheeks. She asked herself in mute amazement how it was possible that such a thing should have happened to her—to "our chaste Diana," as her father used laughingly to call her in recognition of the instinctive little air of aloofness with which she had been wont to keep men at a distance.

Health Insurance

Victoria, Nov. 30—British Columbia, through its legislature, will be urged to adopt state health insurance next year by the Health Insurance Commission, it was indicated Saturday when that body met to prepare its final report. This report, outlining a plan of insurance will be given to the House early in the next session.

Whether this province is going to adopt health insurance or not this will be a definite issue at that session. The overwhelming public support of the principle of insurance which the commission has received indicates that the House will favor it.

The government's chief concern is lest the scheme cost the treasury anything. It is believed definitely that the government will not favor any arrangement which will create a further drain in provincial finances, but would favor a scheme like the Workmen's Compensation which would be carried by employers and employees.

The Six-Day Week

Soviet Russia has made it difficult for even the most prejudiced not to admit that she has the courage to make experiments and the courage to admit their failure.

The latest experiment of the Russians to fail is the five-day week. It has been cancelled and a six-day week substituted. The failure was due to the fact that business was handicapped. If several people were needed to be on hand to complete a piece of business, it was necessary to find a day on which all of them would be employed. Thus it was difficult to rotate the labor scientifically. Furthermore, the volume of work to be undertaken at the present time in Russia is so great that it is really advisable for all the Russians to be working up to the limit of their capacity.

It must be noted that this failure, like that of the system of equal wages for all, was due to the specific circumstances in which Russia finds herself. It is not necessarily a final conclusion, and the question remains an open one. Russia is a little precocious in her experiments, and we are a little reluctant to attempt.

Time to Check the "Gimme" Cry

Some striking figures on government expenditures in Canada were quoted by H. Napier Moore in a recent address in Toronto. Basing his statements on an economic study he said that next year would see total deficit by dominion, provincial and municipal governments of \$250,

000,000. The taxation per average citizen of \$105 in 1918 rose to \$508 in 1930, and during the same period total government expenditures in this country advanced from \$209,500,000 to \$964,000,000.

Making due allowance for the enormous cost of the war and the legacy of heavy interest charges on war indebtedness, the heavy bill which must be paid for the orgy of railway construction, and huge public works required for opening up the country, it is obvious that extravagance has been general in Canadian administration, both federal and provincial. This has been inspired by the prevalent habit of borrowing by means of long term bond issues. It is just beginning to dawn on the Canadian taxpayer that all loans must be repaid in higher taxation. For the first time in many years, there was a tendency displayed in the House of Commons last session to turn a deaf ear to demands for public buildings and public enterprises to be financed out of the federal treasury. The vote-getting value of such appropriations was ignored.

The Toronto Globe thinks it is time the disposition to rush to governments of all kinds for help should be checked. Too many persons, it says, think a government with taxing power has a bottomless purse. It believes money has been spent too freely by some governments in the hope of doing service or in the hope of making friends. Now is the time in its opinion, for forget the word "Gimme" as applied to governments.

The Churchillians

Gandhi's comment upon the results of the Round Table Conference on India was hardly a pacifistic one. He said: "The Churchillians have won, but their victory may only be at terrible cost. For our millions, grinded by England's failure to keep her pledges in India, will not go through another purgatory of suffering to reach their goal of liberty. No army, no armored tanks, no aeroplanes, no machine guns can frighten them."

One wonders where Mr. Gandhi, the apostle of non-violence, the suave politician, has gone. It is true, of course, that Gandhi has said many contradictory things. But it has been largely a case of Gandhi waxing aggressive and bellicose before the Indian Nationalist Congress and waning wild and platitudinous before the British statesmen. This is the first occasion on which Gandhi has even suggested countenancing violence when speaking to Englishmen. It may be, and we sincerely hope it is, an empty boast on his part. If it is not, if it is not, it is a clear case of Gandhi forsaking all the fine

What Shall We Give?

WHAT is more acceptable to a child, a relative or an employee, than money? In the form of a Savings Account, it will endure from Christmas to Christmas and can be added to throughout the year. Give a Bank Book this Christmas. A special seasonal gift cover will be provided.

For Customers who intend remitting money for Christmas gifts, we provide at all our branches a special cheque in Christmas colours.

The Royal Bank of Canada

Lacombe Branch C. A. Sneath, Manager
Branches at Aliz and Red Deer

Ideals he has preached at his various meetings with government officials. If the Churchillians really do win—Gandhi's assumption was a little premature—we cannot blame him. It is better to refrain from promising a man something than to make the promise and then break it.

The possibility that the Churchill reactionaries may get the upper hand of the government provides its own comment upon the weakness of democracy today. Ramsay MacDonald's Labor Government, with the definite (if in some cases reluctant) approval of all parties in the house, pledged Britain's word to a certain policy toward India. He did not pledge her to make impossible concessions, but to work honestly toward the goal of Indian independence. And to the millions of Hindus who know nothing of constitutional government or of the intricacies of the British situation, Britain's word is Britain's word. The fact that it would be another government which broke the word, suggesting Churchill triumphed, would mean nothing.

Furthermore, the fact that the National Government is headed by the man who headed the Labor government which gave the promises makes the prospect of a shift in policy more appalling. It would be difficult for Mr. MacDonald to stand up before an aroused Indian Nationalist Congress and say: "My ideals are unchanged. A Lassi-mouth lout was I born, and a Lassi-mouth lout will I die." If they understood the reference, the only sentiment in which they would concur would be that he was a lion. They know nothing of the wedges which may be inserted, and the levers pulled behind the scenes at Westminster. Patriotic Britons will pray that the Churchillians may not prevail.

DRESSMAKING

First class dressmaking and remodeling. Apply Mrs. C. B. Stephens, (Oscar Johnson house in rear of Pratt's Garage. N12-47.
